OFFICE OF
ENVIRONMENTAL
CLEANUP

July 27, 2015

Mr. Tim Flynn, Principal Hydrogeologist
Aspect Consulting
401 2nd Avenue S, Suite 201
Seattle, WA 98104

Re: Response to November 14, 2014 Letter Received by the U. S. Environmental Protection Agency Regarding the Draft Final Feasibility Study submitted under CERCLA Docket No. 10-2006-0325.

Dear Mr. Tim Flynn:

In a letter dated 24 September 2014, the Environmental Protection Agency (EPA) submitted comments to your clients on the Draft Final Feasibility Study for the Quendall Terminals Superfund Site. On November 14, 2014, you sent a response letter summarizing your clients' policy and technical concerns with the EPA's comments. On December 3, 2014, the EPA met with you to further discuss these issues. Since that time, I have taken the position of the Remedial Project Manager for this Site.

Please find attached the EPA's comments responding to the concerns raised in your letter dated November 14, 2014. As we discussed over the phone in the past few weeks, the EPA anticipates that you will use the comments we submitted in Fall 2014 as the starting point for any subsequent revisions. These comments are being sent slightly in advance of our meeting this week. We look forward to a fruitful discussion that will lead to a quick finalization of the Feasibility Study. If you have any questions, please call me at (206) 553-1813.

Sincerely,

A handwritten signature in blue ink, which appears to read "Claire Hong", is written over the typed name.

Claire Hong
Remedial Project Manager
